

Questions to ask before quoting

TREE GRATES

- What **design** are you interested in? Standard or heel proof?
- If a **custom pattern** is requested, are there drawings or artwork that can be shared?
- What **size** grate(s) are needed?
- How many **sets** are there?
- What **material** and **finish** is required?
 - Is iron oxidation a concern?
 - Do grates need to be lightweight?
- What is the minimum desired **tree opening**?
Breakout rings typically create 12"-20" openings on most standard tree grates. Larger openings may require an additional charge for water-jet cutting.
- Are frames required, and if so, what **frame type** is needed?
 - Note: For "SOR" for pavers on a MORTAR bed – we need thickness of paver + mortar to quote accurately
 - Note: For "SOC" or "SOE" for pavers on a SAND bed – we need thickness of paver + sand to quote accurately
- Will **light fixtures** be incorporated?
Please identify location of light port from edge of grate to center of hole on each axis, diameter of hole needed and number of light ports per set of tree grate required. If you have a specific fixture in mind, please identify the make/model.
- What type of **loads** are you expecting on these grates/frames?
- What is the **project status** (i.e. out for bid, design phase, contractor has the work, customer ready to order, etc.)?
- What is the **PROJECT NAME, LOCATION** (City, State, Zip) and **SPECIFIER**?
- What is the **"SHIP TO" LOCATION** (City, State, Zip)?
 - Are the grates being delivered to a JOBSITE, LIMITED ACCESS, or RESIDENTIAL location?
 - Is a liftgate needed?
