NDS® DRAIN BODIES

CAST IRON TRENCH AND CATCH BASIN GRATES

engineered to fit NDS® DRAIN BODIES

Made in the USA from recycled cast iron, Iron Age's decorative trench and catch basin grates are engineered to fit the most widely used drain bodies, including NDS®. Talk to your supplier for details.

NDS®, Spee-D® and Dura Slope® are registered trademarks of NDS, Inc. Iron Age® and its products are not affiliated with NDS, Inc.

DECORATIVE UPGRADE

IRON OXIDATION FAQ's

Why are my grates turning orange?

Raw cast iron starts out grey in color, but upon contact with water, a bright orange oxide develops. This loosely adhering layer (commonly known as "rust") easily washes or wears away, leaving behind a more tightly adhering oxide coating that actually protects the grate from further corrosion. What you end up with is a warm, reddish-brown patina, similar to any manhole cover in the street.

Sun Drain 12" Catch Basin

Raw Cast Iron | One Month | One Year

Upgrading to designer metal grating is easy and cost effective with Iron Age.

Many of our grates are engineered to fit the most widely used drain bodies on the market today.

How long will my grates be orange?

Depending on the environment the grates are placed in, the oxidation process generally lasts anywhere from a few months to a year. Just keep in mind that the more traffic and weather the grates receive, the faster the transformation.

What if I don't want orange grates, even temporarily?

We generally recommend letting our grates age naturally, but for those who wish to bypass the orange oxidation phase of raw iron, we offer an eco-friendly "BAKED-ON-OIL FINISH" using recycled vegetable oil. As the natural oil wears off, it provides a smooth, graceful transition from installation to final patina. Talk to your supplier for ordering details.

Will my grates rust away to nothing?

Cast iron has been used for hundreds of years in the manufacture of items that need to be exceptionally durable and resistant to corrosion. For example, the Navy has traditionally made ship anchors out of cast iron. Just like those anchors, **our grates will last for decades in a raw state.**
